

Mechanical Clutches for Gp2 & Gp3 pumps (18.5 DaNm)

Series 30300

Mechanical clutches are uni-directional & reversible.
When coupling to hydraulic pumps we recommend to engage & disengage the pump when the directional valve is in the exhaust position at a speed not more than 1800 rpm for uni-directional & 1000 rpm for reversible clutches
Lubrication: Oil type SAE 90
Change oil every 12 months
Working temperature range: -10 to +80 degrees C

The mechanical couplings with two direction arrows are REVERSIBLE
